

## Improved recoveries for Keliber's lithium project

Today, Keliber announced the results from a continuous processing pilot program on the Syväjärvi ore which improved the minerals processing recovery rate to exceed 88% compared to approximately 83% from previous pilot-scale test program. A total of 89 tonnes of spodumene ore from Syväjärvi was processed during the pilot program and a total of 10 tonnes of spodumene concentrate (Li<sub>2</sub>O of over 4.5%) was produced for further processing.

Keliber expects the whole test program, including the continuous pilot test programs for conversion and LiOH processes and the related test run reports, to be completed by the first quarter of 2020.

Keliber's full announcement is available at <https://www.keliber.fi/en/investors/news-releases-and-publications/>.

Nordic Mining ASA holds an investment of 18.5% in Keliber.
