Announcement no. 1/2024

BankNordik is revising the guidance for the net profit for 2023 from the earlier announced estimate of DKK 260-290m to be in the range DKK 295-310m.

The adjustment is driven by an improved outlook in core operations and by the customers' resilience in the face of inflationary pressures, which has led to lower than expected impairment levels.

The bank will publish the Annual report 2023 on 27 February 2024.
